Video Communications for Telehealth

Increase quality of care and build engagement with modern video communications

**Improve patient outcomes**
Expedite hospital staff and specialist collaboration for patient care with real-time video communications.

**Maximize your resources**
Utilize resources and hardware you already have to expand your capabilities and telehealth offerings.

**Boost internal communications**
Foster collaboration and face-to-face meetings, trainings, and recruiting with participants in any location.

- HD video and audio provide exceptional clarity and quality for telehealth visits.
- Patients may be treated virtually from anywhere, from any device, ensuring timely medical care.
- Consistent high-quality video conferencing, even in low-bandwidth environments.
- Simple user management and single sign-on make video a seamless component of the telehealth experience.

"Other applications don’t allow for multiple members to join in a HIPAA enabled setting, but Zoom does. Now doctor, patient, and family members can be in the conversation."

Dr. Chris Gallagher, MD
Access Physicians

**Compliance and security**
Multi-layer security with AES-256 encryption

**Patient waiting room**
Providers can see who is waiting while maintaining patient privacy.

**Integrate seamlessly with Epic**
Launch a video visit directly from the Epic applications’ telehealth workflows.

**Accessibility for all participants**
Ensure that everyone can participate equitably with closed captioning and keyboard shortcuts.
**Enhanced collaboration features**
Collaborate with other doctors and specialists by annotating directly on the shared screen so that notations are visible to all attendees.

**Medical device integrations**
Examine and treat patients virtually with far-end camera control, EHR and medical device integrations, and in telehealth carts.

**Recording session review**
Save your meetings for consultation and review.

---

**What does video-enabled patient care look like? Let’s take a look!**

- **Ensure timely internal communications between administrative and medical staff across the hospital.**
- **Telehealth consultations connect physicians, patients, and specialists for regular or urgent care.**
- **Progressive health education and preventative care for high-risk populations.**
- **Widespread, immediate coordination and real-time assessment for disaster response.**
- **Cost-effective continuing education and ongoing training for healthcare professionals.**
- **Provide virtual behavioral and mental health in 1-1 or group sessions that patients may join from their homes.**
